2.1 History

Asutext & G Nigeria Limited was established by a group of experienced and forward-thinking Nigerian entrepreneurs who identified a persistent gap between the service standards Nigerian consumers deserve and what the market was delivering. Their conviction was simple but powerful: that a Nigerian business could be built from the ground up on the foundations of quality, transparency, and genuine commitment to the client, and that such a business could not only succeed but thrive and grow into an enterprise of national significance.

The Company was formally incorporated on 14th September 2023 under the CAMA 2020 framework, giving it full legal standing to operate across multiple commercial sectors. Its founding operations were centred on professional cleaning and facility management services, a sector chosen deliberately for its consistent demand across residential, commercial, and industrial markets and for its immediate potential to generate employment and community impact.

From that foundation, the Company's leadership moved with purpose and strategic clarity to expand into complementary sectors. Recognizing that Nigerian consumers were underserved across transportation, fashion, catering, and mobile technology, Asutext & G Nigeria Limited structured each new division with its own operational framework, service identity, and dedicated commitment to excellence. By building each division properly from the outset rather than expanding haphazardly, the Company ensured that quality and reliability were never compromised in the pursuit of scale.

Operating today from Cross-River State and Lagos, the Company serves clients across multiple states and has built a growing network of relationships with corporate organisations, event planners, private individuals, and institutional clients. Though relatively young in its journey, Asutext & G Nigeria Limited carries the ambition, institutional discipline, and operational maturity of a Company determined to leave a lasting legacy on Nigerian enterprise.

Goals & Final Notes

What is the single most important thing your website should do for you? *

e.g. Get enquiries from new clients, Sell products without me managing orders manually, Show my portfolio to potential employers, Make me look more professional when pitching

> Get enquiries from new clients in Lagos for my cleaning, laundry, and fumigation services, and make it easy for them to contact me on WhatsApp.

Why this works:

1. *"Get enquiries from new clients"* – That's the core job of 90% of service websites. Everything else supports this.
2. *"in Lagos"* – Tells them to focus on local SEO and location-specific copy.
3. *"for my cleaning, laundry, and fumigation services"* – Focuses the homepage on your 3 main money-makers.
4. *"make it easy to contact me on WhatsApp"* – Most Nigerians prefer WhatsApp over forms. You're telling them the CTA matters

Who are your main competitors? (Optional — share their names or website links)

We use this to understand your market positioning and make sure your site stands out.

<https://www.cleaningnigeria.com> – They're strong on office cleaning in Lagos.

<https://www.laundryroom.ng> – Good at online laundry bookings.

<https://www.fumigationsng.com> – Seen them running ads for pest control.

Is there anything specific you absolutely want on the website that we haven't asked about?

- > 1. *WhatsApp button on every page* – Most clients in Lagos prefer to chat on WhatsApp instead of filling forms.
- > 2. *Clear service pages for Cleaning, Laundry, and Fumigation* – These are my main services and need to be easy to find.
- > 3. *Service areas listed* – Show the areas in Lagos I cover so people know if I reach them.
- > 4. *Before/after photos and customer reviews* – Helps build trust for cleaning , fumigation , gardening services

Is there anything you absolutely do NOT want on the website?

e.g. No bright colors, don't use photos of me, don't include pricing, etc.

- 1. *No clutter or confusing layout* – I have many services, so I don't want the site to look messy or overwhelming.
- > 2. *No heavy animations or slow-loading effects* – Most of my clients are on mobile with limited data, so speed matters.
- > 3. *Don't hide contact info* – My WhatsApp number and phone should be easy to find on every page.
- > 4. *No stock photos that look fake* – I'd rather use simple, clean images or none at all

Any other notes, questions, or things you want us to know before we start?

- > 1. ***Mobile-first design*** – 90% of my clients will view this on their phone, so it needs to load fast and look good on mobile.
- > 2. ***SEO for Lagos*** – I want the site to show up when people search “cleaning services Lagos”, “laundry near me”, etc.
- > 3. ***Easy to update myself*** – I’d like to be able to add new services or change prices without calling you every time.
- > 4. ***WhatsApp integration*** – Make sure the WhatsApp button works on every page and opens with the pre-filled message we set.
- > 5. ***Timeline and cost*** – Please confirm how long this will take and what’s included in the price before you start.
